

# Cell Dissociation Solution

**Product No:** PC-33689

## Introduction

Cell Dissociation Solution is a kind of membrane filtrated isotonic solution with the activity of proteolytic and collagen-lysis. It has mild activity and is suitable for the hydrolysis and separation of cells from various tissues, including fish ovary.

## Size

60mL

## Storage

It is recommended to store at  $-20^{\circ}\text{C}$  away from light after packaging.

## Usage

Cell Isolation Solution is a working concentration that can be directly added to the tissues to be dispersed and incubated at  $25-37^{\circ}\text{C}$  for an appropriate time. The digestion time can be adjusted according to the extent of tissue digestion.

## Expiration Date

The product can be stably stored at  $-20^{\circ}\text{C}$  for 1 year.
